Call for Nominations

Editor-in-Chief, Decision Analysis

Deadline for Nominations: April 15, 2025

The final term of Professor Vicki Bier as editor-in-chief of the journal Decision Analysis will expire on December 31, 2025. Based on recommendations from the INFORMS Publications Committee, the president of INFORMS has appointed a committee to conduct a full search for a new editor-in-chief. The committee intends to propose a candidate for approval by INFORMS no later than June 1, 2025. The committee seeks opinions and comments from all interested parties on (1) the current state of the journal; (2) recommendations for changes, if any; and (3) candidates for editor-in-chief.

Princeton University's Department of Psychology invites applications for our Microsabbatical program. This program fully funds a short-term (2-4 week) visit to our department for early-career faculty. The program focuses on professional development such as creating a long-term mentoring relationship, developing a skill, and/or starting a research collaboration with faculty in our department.

If you're a junior faculty member who is interested, we hope that you'll apply!

The deadline to apply is April 15, 2025. For more details, please visit: [\[link\]](#)

*Charley Wu (charley.wu at uni-tuebingen.de) writes:*

We invite you to apply to the 3rd Computational Summer School on Modeling Social and collective behavior (COSMOS) taking place from September 29th - October 3rd in Tokyo, Japan.

COSMOS is designed to provide attendees (COSMONauts) from diverse fields (e.g., psychology, economics, neuroscience, biology, computer science) and career stages (master, PhD, postdoc, and junior PI) with the computational skills required to tackle emerging challenges in understanding social learning and collective behaviour.

As always, COSMOS is free to attend. We will provide free accommodations for 20 attendees and a generous travel stipend to a small number of participants to ensure a diverse and inclusive summer school.

For more details, check out our [\[website\]](#).

Applications are due by April 25, 2025

## Professorship in Marketing at INSEAD in France

INSEAD invites applications from junior or mid-career scholars with exceptional research records for a full-time tenure-track faculty position in Marketing at the Assistant or Associate levels. Applications from Full professors will also be considered if they have a truly remarkable record of accomplishments in research and thought leadership. The position will be available at our European campus in Fontainebleau, near Paris, France, or Singapore, starting in September 2026 and will remain open until it is filled. It can be preceded by a short-term visiting position during the academic year 2025-2026.

All research profiles are encouraged to apply. Particular attention will be given to candidates who are enthusiastic about INSEAD's mission to be the business school for the world and have demonstrated an ability to combine excellence in research and teaching in degree programs and executive education.

### Postdocs in Demographic and Aging Research at RAND

RAND's Postdoctoral Program in the Study of Aging will be recruiting for two new fellows this Spring. This program provides an opportunity for outstanding junior scholars in demographic and aging research to sharpen their analytic skills, learn to communicate research results effectively, and advance their research agenda at RAND. The program is funded by a training grant [\[link\]](#) through the National Institute on Aging (NIA).

Please see RAND's Postdoctoral Program website for more information [\[link\]](#) where you can find the application form and additional application requirements. Furthermore, if you know someone else who might be interested, please forward along this email to them.

RAND will begin accepting applications beginning April 1, 2025. Applications will be considered and accepted on a rolling basis. The application deadline is May 23, 2025.

Additional important details:

- Anticipated start date of the fellowship is in July 2025, however, the start date is negotiable.
- Fellows receive an annual stipend, travel stipend, and health insurance (depending on their geographic location).
- Fellowships are for one year, with the potential to renew for a second.
- Fellows must be U.S. citizens or permanent residents and must have completed a Ph.D. (or its equivalent) in a relevant discipline before they begin the program.
- Fellows must reside in the U.S.

## 21st Annual Conference of the Italian Association for Cognitive Sciences (AISC)

The 21st Conference of the Italian Association of Cognitive Sciences (AISC) will focus on the role of dynamic interactions in explaining the functioning of complex systems such as brains, communities, networks, and artificial agents. The theoretical and experimental study of dynamic interactions is increasingly illuminating how brains work, how communities behave, and how artificial systems process information. We welcome presentations on the state-of-the-art and ongoing research regarding the multifaceted nature of dynamic interactions in cognitive, social, and artificial systems. We particularly encourage submissions that foster interdisciplinary dialogue among the various subdisciplines of cognitive science, encompassing both theoretical and experimental perspectives.

- Conference date: September 17-19, 2025
- Submission deadline: May 18, 2025
- Notification of acceptance: June 15, 2025
- Registration deadline: 31 July 2025

## Human and Artificial Rationality (HAR-2025)

- Date: 16-19 September 2025
- Location: Paris, France
- Website: [\[link\]](#)

We are delighted to invite you and your colleagues to the 4th International Conference on Human and Artificial Rationality (HAR 2025), which will take place at the Facultés Libres de Philosophie et de Psychologie (IPC) in the heart of Paris.

The conference on Human and Artificial Rationality's main focus is on computational approaches to human reasoning (in the broad sense, including judgments, decision-making,

problem-solving, pragmatics, etc), its criticism, and how human-like artificial reasoning can be. Regarding human rationality, this includes not only formal models of rationality but also the investigation of the different factors that influence or direct human reasoning (including automatic processes and deliberate thinking). Regarding artificial rationality, this does not simply include artificial computational models, but how they relate to human reasoning. Another area of interest is the rationality processes involved in interacting with artificial and human agents.
